Subject: Microsoft Settlement

The microsoft settlement is heavily weighed to the side of bitter rivals that will rage under any circumstances. To subject microsoft to their bitter rivals wishes means compromising security to those of us that choose microsoft. The bitter companies and the way they want this situation dealt with not only serves to punish microsoft but those that love America and what she stands for and whom she should justly reward (the achievers, not the underachievers). This is just another example of hate trying to invade the American way, or freedom to be the best one can be. I beg of you, do not allow the spoiled sports to run this country. For as sure as the way they run with "microsoft, the convicted felons" will they run with the generous offers of microsoft. The bitter rival companies are punishing individuals. It there is a worser crime it is the bullies(bitter rivals) that feel they have been bullied (by microsoft) bullying you and I into their mentality of mediocrity, focusing on the wrongs in life they have been dealt, instead of focusing on the rights. Microsoft has been punished and curtailed. So have I and so has Suzi down the street. But that does not mean I should open up my doors to those I have wronged and allow them to run my household and loot from me, nor to be allowed to take the quality out of what I have. Open your eyes and you will see by the vicious viruses that have spread to discredit microsoft whom the worst offenders are. Give them more ammunition and they will run with it all the way around the world to terrorize America. Thank you. Justice is to be served which should include the terror tactics the bitter opposition has brought upon microsoft.
